**'big bang theory**

*May 26th, 2020 - the big bang theory is an effort to explain what happened at the very beginning of our universe discoveries in astronomy and physics have shown beyond a reasonable doubt that our universe did in fact have a beginning prior to that moment there was nothing during and after that moment there was something our universe'***'beyond the big bang science and spirituality isha sadhguru**

---

---

*May 16th, 2020 - sadhguru recently i happened to be in a presentation by a popular scientist he has written a book called endless universe it has been very popular in the scientific circles he called this particular session beyond big bang because until recently the scientific community believed that everything has happened because of the big bang'*

**'wmap big bang concepts**

May 24th, 2020 - by definition the universe encompasses all of space and time as we know it so it is beyond the realm of the big bang model to postulate what the universe is expanding into in either the open or closed universe the only edge to space time occurs at the big bang and perhaps its counterpart the big crunch so it is not logically necessary or sensible to consider this question'

**'planet earth the big bang and beyond michael bright**
